Rebuilt Toner Made in Germany

**NO own brand and NO direct business**

## **PS – the remanufacturer in the background**

Right from the start, 30 years ago, one thing was carved in stone:

**Never become a competitor to your customers!**

PS PRINTSERVICE does not appear anywhere, neither on a delivery note, nor on a box or on a shipping label. We strengthen our partners by packing the cartridges 100% in private label boxes. This strengthens your brand name, increases the recognition value of your company and thus leads to a higher success rate.

## Drop shipments and cost center deliveries

### **Force drop shipments and reduce tied up storage capital**

We deliver on your behalf, with your name and your documents directly to the workstations of your customers. And not just to a specific address, because that would be too easy for us. We deliver to the employee's workplace, if necessary to the exact IP-address. Each cartridge arrives at its place of use no later than **48 hours** from time of order.

**Each cartridge is tested before delivery**

### **Nothing works without quality control**

And it is precisely for this reason that we take several test prints of each cartridge before delivery. No matter whether A, X or even Y. None of the cartridges we recycle leave our facility untested. This is the only way we can currently look back on customer satisfaction level of over **99.5%**.

You and your customers will notice this instantly!

**ISO 19752 & 19798 certified**

## **Productivity is the measure of all things**

The two **ISO** standards **19752** for monochrome and **19798** for color cartridges regulate precisely this yield. As one of the few remanufacturers in Europe, we have the necessary climatic chamber to be able to meet these ISO standards. This is the only way we can ensure that our cartridges work just as well in Scandinavia as they do in Southern Europe. Annual ISO certification by an independent institute is therefore mandatory to us.

## Outstanding support from dedicated departments

### **Partnership cooperation is at the heart of our business**

With the help of our dedicated special departments, we provide our customers with direct and indirect support and advice. **Even more:** through regular company visits in connection with constantly changing training topics, we maintain an ongoing dialogue with our customers. In addition, our in-house specialists in the design, IT and technical departments are actively available to our customers.

**Exclusively European virgin empties**

### **Legal security is very important to us**

Through the exclusive use of European empties, we prevent a violation of the “first sales doctrine”. Furthermore, the use of so-called virgin cartridges, which have been used only once, offer a high-quality advantage. Even if DIN 33870-1 / 2 allows multiple recycling of individual cartridges, we set our quality standards even higher. **For your own safety!**

**100% rebuilt in Germany**

**MADE IN GERMANY**

### **Our products are sustainable**

100% reconditioning in Germany means that long transport routes are completely eliminated. Recycling in Germany and the associated short distances within Europe, lead to a direct improvement in the overall **carbon footprint**. By rebuilding cartridges that have already been used, we save tons of plastic from ending up in landfill.
